

The Office communication dated: 27th January 2010 contained Examiner's Amendment/Comment to which this is the response.

The Examiner's amendments to the patent application are as follows:

1. In the specification on page 17 delete paragraphs 50, 51, and 52.

Inventor's Response: The amendment suggested above (1) by the examiner is acceptable.

2. In the specification on page 17 in the first and second lines of paragraph 54 delete, "Figure 1 shows typical known metabolism pattern of essential fatty acids as known in prior art".

Inventor's Response: The amendment suggested above (2) by the examiner is acceptable

Since both the amendments suggested by the examiner are accepted, I request the US Patent office to issue the patent at an early date. I may bring to your kind notice that I have already paid the patent issue fee of US\$ 1055.

I am here with enclosing a self-addressed stamped envelope containing a copy of this letter which can be duly stamped and returned to me as the acknowledgement of receipt of this response.

With regards,

Sincerely,

Undurti Narasimha Das

Inventor

Date: 29th January 2010
